SUMMARY

As a front-end developer with a background in Mechanical Engineer and graphic design, I bring a unique blend of skills to the table. I have a deep proficiency in JavaScript, React and CSS frameworks, and have used WebGL with threejs to create immersive web experiences. Additionally, I possess technical knowledge in 3D modeling, prototyping, and simulating mechanical components. Some of my achievements include developing landing pages for companies and 3D demonstrations of its products. I am a enthusiast of Artificial Inteligence, machine learning, and data science, and I always eager to learn more. I am actively seeking new oportunities in web developer, where I can contribute my skills and experience to create innovative user-experiences and bring positive impacts to the company and the world.

EXPERIENCE

Freelancer front end developer

Autonomous
2022 - present

I've been working as front end developer for the last year, developing landing pages for companies, and 3D experiences in web applications. I'm learning at least one new thing every day programming users interfaces and experiences.

Trainee Mechanical Engineer

Bosch GmbH
2022 - 2023

As a trainee at Bosch do Brasil I was working on the development of a inovation product for a new line of products at the company. I was part of a team of mechanical and eletrical engineers, designing, simulating and testing the prototypes under the agile management system. I learned a lot about product development, project management and teamwork. It was a great experience having to learn how a multinational company such as Bosch works.

Freelancer Mechanical Designer

Ausi do Brasil Ltda
2020 - 2022

As a mechanical engineer student and newly graduated I worked at Ausi as a mechanical designer, helping a team of engineers design and deliver conveyor belts for an automotive assembly line. I learned many hard and soft skills such as CAD design, prototyping, project development and leadership.

EDUCATION

Specialization in Data Science

Universidade Tecnologica Federal do Paraná
2022 - present

Mechanical Engineer

Universidade Tecnologica Federal do Paraná
2016 - 2021
